www.ISLOG.US

- IDTransfer reads a badge identifier using a desktop reader (USB).
- As soon as a card is detected, a specific action is executed.
- You can also receive information or execute an action when a card is removed.
- Versatile, **IDTransfer** is the best solution to replace bar code identification, swipe card or any other RFID identification.
- Interactive, **IDTransfer** is designed to manage any kind of software and, most often, without specific development.
- Multiple USB RFID Reader support
