

ZonEZ™

ZonEZ™

Hands-free IT Automation with RFID

IT Automation, Hands-Free

ISLOG's ZonEZ enables the association of a specific IT action upon a user entering or exiting each of the 4 different ZonEZ around each reader.

Reduce your time to information while making it easy for multiple users in a shared-workstation environment such as a hospital, warehouse or corporation.

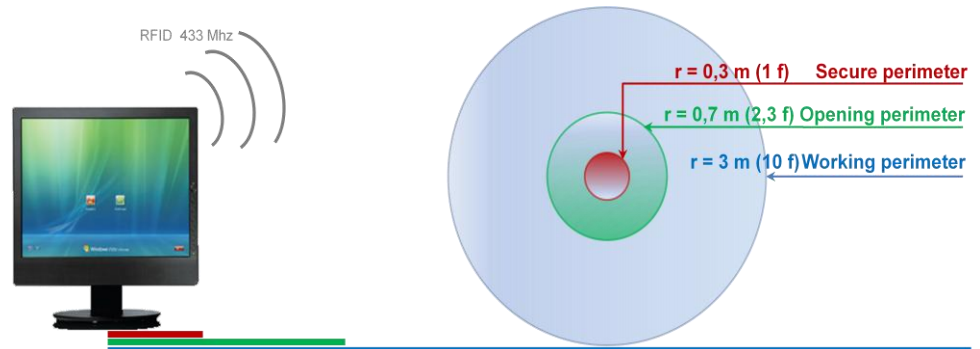

ZonEZ combines your 125 KHZ or 13.56 MHz credential and 433 MHz UHF RFID technology allowing users to custom-tailor multiple zones around each workstation or PC environment: Secure Zone, Opening Zone, Working Zone and Detection Zone -- each Zone is individually configurable for a unique and flexible solution to fit any situation.

ZERO DOWNTIME

The cost of maintaining passwords is not only time-consuming but also expensive. Eliminate downtime caused by constantly changing passwords.

- Adapts to *where you are* in the different zones
- Open and close Windows sessions, workstations and more with RFID
- Associate actions such as: open/close application, save file, print buffer and more
- Handles Multi-User prioritization
- Customizable zones up to 50'
- Utilize existing credentials – 125 kHz or 13.56 MHz
- Windows, Linux, TSE and Citrix
- Scalable
- Support for Single-Sign-On (ESS)
- Dynamic enrollment with ISLOG badge holder
